Team working

Problem-Solving Project
Management

PROFESSIONAL EXPERIENCE

DevGo (Startup Team) Full-Stack Developer   **Tashkent, Uzbekistan | October 2024**

- Led development for 13 startup projects focusing on quality and speed.
- Contributed to two hackathon-winning projects centered on AI and sustainability solutions.

PDP Spring TechFast   **Uzbekistan | May 2024 – June 2024**
Software Engineer Metor

Assisted project managers in planning and implementing various projects, ensuring project deadlines and deliverables were met. Monitored project budgets, tracked costs, and prepared financial reports to ensure cost-effectiveness and adherence to financial guidelines, and shared project creation skills in implementing small projects.

EDUCATION & CERTIFICATIONS

PDP University, Tashkent
Bachelor of Science in Software Engineering (Ongoing)
October 2023 – Present Relevant Coursework: Machine Learning, Data Structures, Algorithms, Artificial Intelligence, Computer Vision, Advanced Programming

Edfix, Najot ta'lim

.NET Specialist Course (Ongoing)

PDP ONLINE , PDP Academy

.NET Development Course (Ongoing)

PROJECTS

BarakaBooking website   2023
Role: .NET Backent Developer

This application is a shopping site, and this application is focused on book sales, and it allows you to use free books online and buy books. The application has a monitoring and reporting sheet.
I used the ASP.NET Core library and Docker database to work on the backend of this application and completed it successfully.

Restaurant Management System   2023
Role: .NET Backent Developer

I worked on this application with a team. My role was as a C# backend developer. This application was developed to automate a restaurant and was completed on time with my team. We used ASP.NET Core technology wisely. While building this application, I improved my experience with JavaScript and also tried my hand at Angular technology.

Control WS   2024
Role: .NET Backent Developer

I worked with a team on this application. My role was as a C# backend developer. This application was a StartUp project and the goal of this project was to create a warehouse management application for any service organization, what made it different from other applications was its adaptability to any environment
and we successfully completed this project.

SmartShop   2024
Role: .NET Backend Developer
An e-commerce platform designed for small and medium businesses to manage products, process orders, and integrate secure payment systems. Key features include inventory management, order tracking, and JWT-based authentication.
Responsibilities:
- Developed RESTful APIs and integrated with a Microsoft SQL Server database.
- Implemented business logic using Entity Framework Core.
- Deployed backend services using Docker containers.
- Wrote unit tests and created API documentation with Swagger.
